

CU₂₉

Specifications

Fabric/Design:

- Sanitised stretch knit fabric
- Adaptive treated
- Resistex Copper infused Fabric

Quilting: All layers are Australian Made and Sanitised

- **Firm:** Quiltec, Wool, Visco Gel, Conventional foam
- **Medium:** Quiltec, Wool, Visco Gel, Conventional Foams
- **Plush and Medium:** Quiltec, Wool, Visco Gel, Conventional foams

Comfort Layers: All foam layers are Australian Made and Sanitised

- **All feels have Hygroflex Technology**
- **Plush:** Premium quality Foams
- **Medium:** Premium quality Foams
- **Firm:** Premium quality Foam

Support Layer:

- 5 zone pocket spring unit made on site at BedMaster
- Hourglass progressive spring technology
- Encased with high density foam box
- Premium high density Ventilated support layer
- 10 Year Guarantee

Benefits

- Soft touch, requires zero maintenance
- Moisture wicking technology, keeps you drier and more comfortable
- Copper is naturally anti-microbial and its exceptional conductive qualities help draw excess heat away from the sleeper

-
- Quiltec is a durable and more breathable alternative to poly
 - 150 gsm of 95% Australian wool, excellent thermal properties
 - Visco Gel helps stabilize temperature throughout the night
 - Conventional foams provide enduring comfort and pressure relief

-
- Australian made Hygroflex combines the functionality of memory foam with the durability of high resilience foam. Excellent pressure redistribution and heat dissipation
 - Australian made Premium quality foam layers are used to obtain the three feels, while providing enduring comfort and support.

-
- Interactive Coil Design designed to relieve pressure during the night
 - Hourglass, progressive spring technology responds to your bodies individual shape and weight. Providing reduced partner disturbance
 - Premium Quality High Density foam box to stabilise the sleep surface, and greater edge to edge comfort.
 - Ventilated foam base provides moisture and heat evaporation
-
