Latitude

No two bodies are the same. Meet the Latitude – one mattress, two different feels.

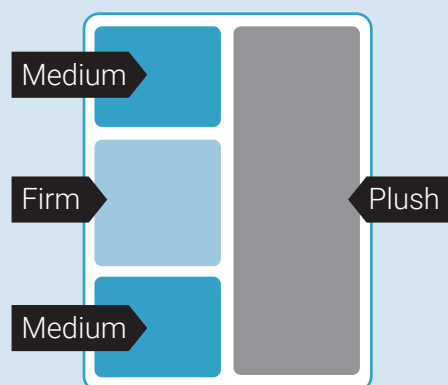

- Different body shapes and health issues demand a personalised approach to finding the right sleep solution.
- Rarely does one mattress 'feel' suit the needs of two different height or weight people. The modular design of the Latitude mattress allows each person to choose their own comfort preference without compromise.
- Perhaps you have an L4-L5 lower spinal injury and requires a more supportive 'firm' mattress feel than your partner who prefers a 'plush' feel. The Latitude mattress design accommodates two feels in one mattress so you can both sleep the way you choose to without compromise.

Example:

Bruce & Anne

With the Latitude Mattress, each person was able to **tailor their side** of the bed to accommodate their own comfort preference.

Bruce (50)

lower back injury, required a firm mattress to assist recovery.

Anne (52)

prefers a softer, more forgiving feel, firmer surfaces cause hip pain.

Result:

Better sleep, reduced pain, no compromise.
